44	9.5	28.6	10	12	11.3
45	10.5	29.3	11	13	11.5
46	11	30	12	14	11.8
47	12	30.6	12.5	14.5	12.1

How to find your size?

To know which size is appropriate, it is better to measure your foot during the end of a day.

- 1 . Be barefoot or put on the socks that you plan to wear with the shoes
- 2 . Applying weight on your foot, trace both feet as it's normal for one foot to be longer than the other
- 3 . Measure the distance from the tip of your longest toe to the furthest part of your heel
