### FOLLOW THE STEPS BELOW FOR AN INDICATION OF YOUR CORRECT SHOE SIZE

Grab a pen, a ruler, and a sheet of paper. Use a hard flat surface to get the correct measurement.

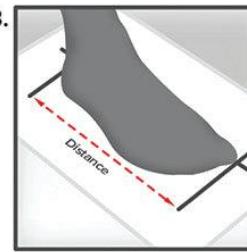

#### HOW TO MEASURE

Draw a straight line longer than your foot on a piece of paper, then place the paper on a flat hard surface.

Stand on the line with your heel and your longest toe centered, mark the tip of the longest toe and the back of the heel. Repeat these steps for the other foot.

Then, measure the **distance** between the marks. Using the larger of the two measurements, compare to the conversion chart to find your correct shoe size.
